

SafeRide — Accessibility Check

1. What this check is about

There are rules that make sure apps are easy to read and use for everyone, including people with low vision or difficulty tapping small buttons. This check looks at two things in the SafeRide app:

- Colors : is the text easy enough to read against its background?
- Buttons/icons : are they big enough to tap comfortably, especially since this is a safety app people may use in a hurry?

The color checks below are exact, based on the hex colors from the audit file. The button size checks are based on what's visible in the screens a few need to be double-checked directly in Figma since exact pixel sizes aren't visible from the exported images.

2. Color Check .Is the text readable?

Where its used	Text on Background	Pass or Fail
Normal body text & headings	Dark text (#111827) on White	Yes , very clear, no issue
Body text on gray cards	Dark text (#111827) on Light Gray (#F5F6F8)	Yes, very clear, no issue
Small captions / dates / driver names	Gray text (#687280) on White	Yes, very clear no issue
Small captions / dates on gray cards	Gray text (#687280) on Light Gray (#F5F6F8)	Yes, very clear no issue
Main buttons (Login, Get Started, Book Ride)	White text on Blue (#1E3A8A)	Yes, very clear, no issue
SOS / Emergency buttons & alerts	White text on Red (#E53835)	Yes clear
Warning banners & yellow chips	White text on Yellow (#F88C00)	Yes , its clear
Warning banners & yellow chips (fix)	Dark text (#111827) on Yellow (#F88C00)	Yes, this fixes it completely
"Completed-Safe" / Safety Score badges	White text on Green (#43A047)	Pass.

4. Button & Icon Size Check

Button / Icon	Where it's used	Is it easy to tap?
Main buttons (Login, Sign Up, Get Started, Book Ride, Continue Route)	Onboarding, Home/Rides, Route Deviation	Yes, big enough, no issue
Big round SOS button	SOS tab, Trip screens	Yes, big enough, no issue
Bottom menu icons (Home / Trips / SOS / Alerts / Profile)	Every screen with the bottom bar	Yes, Size is enough
Back arrow (top left)	Almost every inner screen	Icon size is enough
Text-style actions ("Cancel", "View Route", "Continue Route" when shown as plain text, not a button)	SOS pop-ups, Route Deviation, Call/Contact screens	Yes, it is easy to tap.
